## 6.1 Live TV

**a. Live TV Channels Category:** This consists of different categories such as English News, Music and Movies, Hindi and Punjabi, Pakistani, Nepalese, Bengali, International, Sports, etc and a list of channels that fall under each category.

**b. EPG/DVR feature:** This feature provides you the option to view the program schedule of a particular channel in the form of an Electronic Program Guide. Digital Video Recording (DVR) feature is also available where you can watch previously recorded TV programs.

**c. Set/ Unset Fav:** User can set/unset a channel as his/her favorite channel according to their preferences. A star icon will be seen beside the channel when the channel is set as fav, and will disappear once it is unset as fav. A new Favorite category is also seen once any channel is marked as a favorite channel.

**d. Buy/Free/Bought:** Indicates if the channel is available for free, has been bought or needs to be bought.

**e. Preview:** An option to On/Off preview is given to the user. If the preview is turned on, when focus is set on any other channel without playing it, a preview can be seen on the bottom-right corner of the screen. This enables the user to get a sneak-peek of a channel without having to actually play it.

**f. Quick Menu:** On pressing the OK button on the remote, when any channel is playing, without the menu being displayed, a quick menu, with all the channel categories and channel listing can be seen on the screen. This provides easier access to the Live TV channels.

## 6.2 Movies

You can watch different genre of movies in this section. You can also parentally lock the movies that you do not want your children to watch.

Both free and premium movies are available to watch as per user's choice. Users are also facilitated by the Pay per View feature in World on Demand.

## 6.3 TV Shows

This section consist of some YouTube channels and some featured TV shows. This is a Video on Demand service.

## 6.4 YouTube Plus

This section consist of useful YouTube channels from where people can learn and stay updated to new channels and videos. Multiple YouTube channels can be accessed from here.
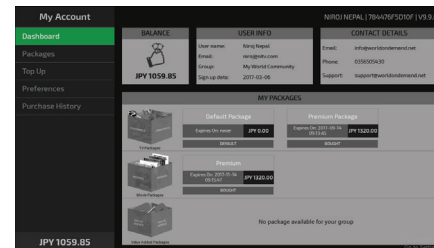

## 6.5 Video Chautari

This feature includes all the on demand Nepalese videos of different genre.

## 6.6  Highlights Nepal

This feature allows you to watch Movies, Songs and Videos published by the popular movie distributor and YouTube channel Highlights Nepal.
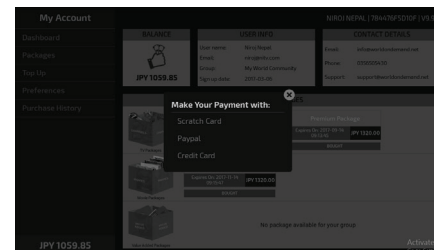

## 6.7 My Account

**a. Dashboard :** This consists of the details about the user's account including user's current balance,
User info and the details about the various packages.

**b. Packages:** This section consists of the details about the packages the user has bought and also consist of the various TV and Movie packages that are available.

**c. Top Up:**

The user can top up balance into their World on Demand account via WOD scratch cards, Paypal or Credit cards.

**d. Preferences:** The user can choose to set screensaver, or pin, according to his/ her preferences.

**e. Purchase history:** This consist of a list of purchases the user has made till date.

## 9. How do I connect WiFi to the World on Demand STB?

To connect WiFi in the World on Demand STB, please follow the steps listed below:
**a.** Disconnect the LAN cable (Ethernet) connected to the set top box.
**b.** Navigate to Settings through the Side navigation menu of the Launcher
**c.** Select Network settings
**d.** Navigate to the WiFi option and turn it on
**e.** Select the desired WiFi network.

## 10. General Troubleshooting Tips

If none of the apps are being able to open because of Memory Problem :
 Press the Refresh Button shown in the side navigation menu of the Launcher.  This will clear the cache memory.
 Alternatively you could also Go to Settings > Factory Reset > Clear Cache.

For Factory Reset
 Go to Settings > Factory Reset > Choose Factory reset
It might take some time to reset. Therefore you might have to wait for some time till the factory reset is processed and the box is rebooted.

If Date and time displayed in the launcher is not correct
Go to Settings > Time and Date > Select Correct Time zone and Format
